

## POLITICS

PPP's philosophy is based on the belief that the development and implementation of the quality management system (QMS), and the Good Manufacturing Practices of its products, is a direct result of the work of all those who are part of this company. .

The values on which we base our management are:

- More than 40 years of experience in the business
- Versatility and ability to adapt to customer needs
- Continued investment in Innovation, Quality and Training.
- Credibility and responsibility.

The PPP Directorate focuses its QMS on processes, customers and people. Our system is based on the requirements of the ISO 9001 and ISO15378 standards and the applicable regulations demanded by our clients, and on the continuous improvement of its effectiveness, and establish the purpose of complying with the mutually agreed requirements regarding food and pharmaceutical products. .

To ensure the fulfillment of this objective, the management of PPP promotes the following principles:

- Satisfy our customers, always committing ourselves to the requirements and guarantees of all agreed specifications, from the point of view of production, food and pharmacological safety, and Good Manufacturing Practices.
- Guarantee the safety and reliability of the product, based on its perfect identification and traceability.
- Guarantee the maintenance of an effective communication system, both internal and external, in matters related to the quality of our products.
- Guarantee a quick, effective response and efficient service.
- Achieve greater competitiveness in the market; stay ahead with improvements in our production and technological process, investing in new machinery and technology.

Therefore, the Management bases its commitment on Quality, on food and pharmacological safety and on Good Manufacturing Practices for the primary packaging materials, through the bases of this Policy, which are the following:

- The correct development of the QMS is everyone's responsibility. Therefore motivation, training, and communication are essential and have the commitment of the Management.
- Providing the necessary resources, both human and material, to achieve the proposed objectives.

Quality, food and pharmacological safety and Good Manufacturing Practices are supported by the COTO (Context of the Organization). This improvement document includes a continuous review of the Policy to ensure its suitability and effectiveness.

- The objectives of Quality, food and pharmacological safety and Good Manufacturing Practices will be consistent with the general objectives of the organization.
